CHRISTIAN HEALTH SERVICE CORPS

2025 Annual Report

healthservicecorps.org

Greg & Candi Seager

Dear Friend,

As we look back on 2025, we are filled with gratitude—for the lives saved, the communities strengthened, and the unwavering support of people like you who make this mission possible. When we launched Christian Health Service Corps 16 years ago, we were responding to a simple but urgent calling: To bring Christ-centered compassionate healthcare to those in need around the world. That call has only grown louder.

Half the people in the world do not have access to essential lifesaving healthcare. As a result, one child dies every seven seconds, primarily because they lack access to essential healthcare! One mother dies every 2 minutes due to complications of childbirth, also because they are unable to access care. As Christians, we feel called to respond to this global crisis. In the Gospel of Luke, when Jesus sent his disciples to proclaim the Kingdom of God, he also instructed them to heal the sick.

> “Heal the sick who are there and tell them, ‘The kingdom of God has come near to you.’” Luke 10:9

The good news is we are making progress bringing compassionate care to those who need it most! Because of generous gifts from people like you, what we have accomplished is amazing! In 2025, we supported our **30 local hospital partners** across **27 countries** in the provision of healthcare to more than **1.2 million patients**. We achieved this with a budget of less than $6 million making us one of the most cost-effective healthcare charities in the world! But we are just getting started. Our goal is to bring healthcare to 10 million people each year. Every prayer you offer, every dollar you give, brings us one step closer to this goal.

Thank you for being part of our team and thank you for helping make this vision to bring Christ centered compassionate healthcare to **10 million people** each year a reality!

In His Service,

Greg & Candi Seager
Founders, Christian Health Service Corps

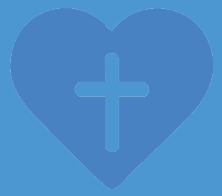

Mission

To build community capacity for Christ-centered, compassionate healthcare.

Vision

To see a world where people no longer die of preventable causes and where the Gospel, primary healthcare and surgical services are available to all people.

Purpose

Following the example of Jesus, we heal the sick, alleviate suffering, comfort the afflicted and restore the outcast while we make disciples who make disciples.

Values

- Servanthood
- Humility
- Discipleship
- Professional excellence
- Stewardship

chsc
CHRISTIAN HEALTH SERVICE CORPS

Global Impact

Christian Health Service Corps is a global healthcare charity supporting a growing list of Christian hospitals across 27 countries. We provide compassionate healthcare, teach and mentor local healthcare providers, facilitate residency training for family physicians and surgeons and help fund hospital infrastructure projects, equipment, and supplies.

We specialize in the following areas: child health, surgical services, maternal health, supporting hospitals and capacity building.

In 2025, CHSC assisted our partner hospitals with:

- Improving access to quality healthcare for more than **39,193,356** people globally
- Treating **1,068,838** outpatients
- Caring for **159,108** hospitalized inpatients
- Providing surgery to **44,661** patients
- Treating **59,284** adults and children for malaria
- Training **4,035** healthcare professionals
- Support mothers in the delivery of **26,034** babies
- Performing **6,285** C-sections
- Caring for **4,776** children with moderate to severe malnutrition
- Caring for a total of **206,297** children
- Caring for **30,770** hospitalized children
- Caring for **2,118** infants and children in intensive care
- Supporting **54** hospital and community chaplains
- Serving **25,681** patients in community health and mobile clinic programs
- **574** Bible studies facilitated

27 countries, 30 hospital partners, one mission. Making lifesaving healthcare accessible where it is needed most.

chsc
CHRISTIAN HEALTH SERVICE CORPS

Maternal Health

Christian Health Service Corps provides high quality healthcare for mothers around the world, saving the lives of young mothers every day. In 2025, we helped our local partners:

- Provide prenatal care for **70,957** mothers
- Support mothers in the delivery of **26,034** babies
- Provide emergency C-Sections for **6,285** mothers
- Provide surgical obstetric fistula repair for **40** women

Understanding the Need

- Every day, almost **800** women die from preventable causes related to pregnancy and childbirth. That is one maternal death every two minutes.
- **95%** of maternal deaths happen in low- and middle-income countries.
- Each day another **200** women will be left with obstetric fistula.

At Christian Health Service Corps we are committed to creating a world where all mothers have access to the care they need, and TOGETHER WE CAN make this a reality.

Child Health

Christian Health Service Corps provides high quality healthcare for children around the world, saving the lives of children every day. In 2025, CHSC helped our local partners provide care for:

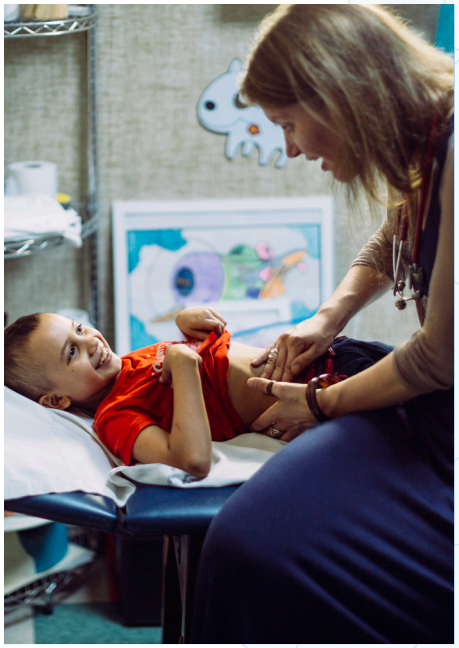

- **206,297** children
- **30,770** children as inpatients in the hospital
- **3,041** children suffering from moderate to severe malnutrition
- **19,761** children treated for malaria
- **1,530** premature infants in intensive care
- **2,118** children in intensive care
- **3,804** children in need of surgery

Understanding the Need

- Each day **13,300** children under age 5 die, **6,200** of those are neonates primarily because they lack access to essential health services.
- Sub-Saharan Africa continues to be the region with the highest under-five mortality rate in the world— **74 deaths** per **1,000 live births**.
- Sub-Saharan Africa and southern Asia, account for more than **80%** of the **5 million** children under-5 who died in 2021.

At Christian Health Service Corps we are committed to creating a world where all children have access to the care they need, and TOGETHER WE CAN make this a reality.

See the Impact of Surgical Care

Scan to watch how CHSC is delivering life-saving surgeries and training the next generation of surgeons to serve millions. One operation can mean a lifetime of hope.

Surgical Care

Christian Health Service Corps provides high-quality surgical care in communities where access to surgery is limited or nonexistent. Our full-time surgeons deliver emergency trauma care, orthopedic surgery, and specialized surgical services, including obstetric fistula repair and treatment of craniofacial deformities. In 2025, we helped our local partners provide:

- **44,661** total surgeries
- **3,804** surgeries for children
- **6,285** C-Sections for mothers
- **245** obstetric fistula repairs

Understanding the Need

- **5 billion people** in the world do not have access to safe surgical care.
- Of the **313 million** procedures undertaken worldwide each year, only **6%** occur in the poorest countries, where over a third of the world's population lives.
- In low-income and lower-middle-income countries, nine of ten people cannot access basic surgical care.
- It's estimated that lack of access to surgery results in the death of **16.9 million people** each year.

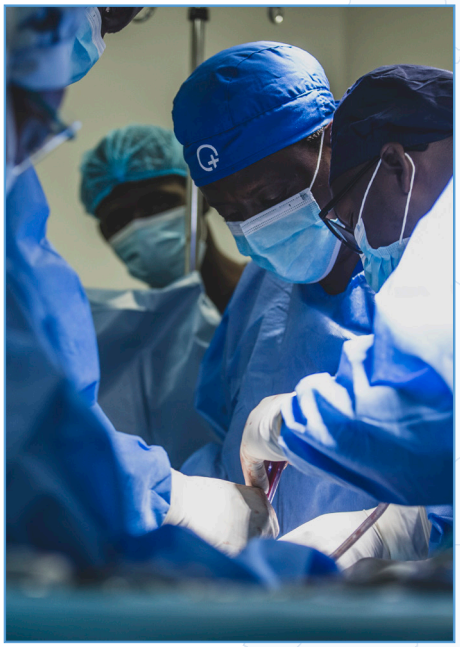

Training Healthcare Professionals

Training the Next Generation of Healthcare Leaders. Christian Health Service Corps is not just about providing care—it's about building healthcare capacity in places where people have little or no access to healthcare. We focus on training the next generation of healthcare professionals in the low- and middle-income countries where we serve.

- **In 2025, CHSC physicians and healthcare professionals helped train a total of 3,138 local healthcare professionals in their respective countries.**
- Of these, 3,008 were medical, nursing or allied health professionals.
- 1,027 were trained through clinical surgical or medicine residencies and clinical mentorships.

Training Surgeons

In 2025 CHSC trained general and pediatric surgeons through surgical residency programs in Angola, Kenya, Ethiopia, DRC, Burundi, Malawi, and Gabon.

Training Primary Care and Obstetrics

In 2025, CHSC trained family medicine OB and pediatric physicians in several locations including Kenya, Malawi, Angola, Ethiopia, Macedonia, Central Asia, and Cambodia.

Training Nurses and Midlevel Providers

In 2025 CHSC trained nurses and midlevel providers in Kenya, Gabon, Angola, and Cambodia.

In 2025 CHSC training of physical therapists in Ukraine remains paused due to the war. However, our physical therapy staff remain there caring for wounded Ukrainian soldiers. This training program will resume when the conflict ends.

Read the Full Story

Scan to see the full story about CHSC Dr. Britney Grayson and her work training pediatric surgeons.

Training the Next Generation

In Kenya's Great Rift Valley, laughter echoes from village to village—but access to healthcare for children is dangerously scarce. With just 30 pediatric surgeons for more than 20 million children, and none in neighboring countries like South Sudan, the need is overwhelming.

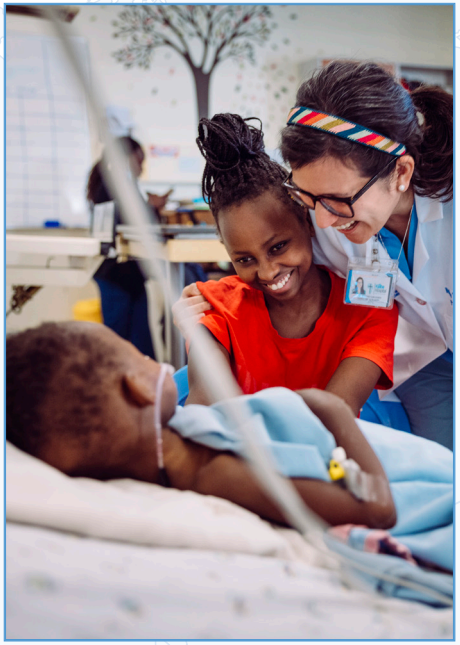

At Kijabe Hospital, CHSC is helping change that. In addition to providing lifesaving care, CHSC Pediatric Surgeon Dr. Britney Grayson trains African surgical residents from across the continent—including Burundi, Ethiopia, and Sierra Leone—who return home equipped to serve their own communities.

> "By training others," Dr. Grayson shares, "we multiply our impact across nations and generations."

These residents receive more than clinical expertise. They are mentored in compassionate, Christ-centered care, learning not only to operate with excellence, but also to lead with faith.

Graduates like Dr. Mehret Enaro are already taking that vision forward. Now serving in Ethiopia, Dr. Enaro is preparing to launch a new training program of her own, continuing the ripple effect of healing and hope that CHSC is helping ignite across Africa.

National Physicians

In 2024 CHSC sponsored the first of what we believe will be dozens of National Surgeons and Physicians, enabling them to practice in the areas of their countries where the need is greatest.

Many new physicians graduate from surgical and medical residency training programs where we serve. However, the places where they are needed most are remote rural hospitals that cannot afford to hire board-certified physicians.

This is why CHSC has started hiring board-certified national surgeons as they graduate residency.

In 2025 CHSC National Physicians performed **1,131 patient surgeries**. **More than 600 of which were for children** at a cost of less than $100 per surgery. Care provided by our national physicians in 2025 includes:

- **167** OB/GYN and C-Sections from August to December
- **623** pediatric surgeries
- **341** adult surgeries

National Physicians in Action

Scan to watch how CHSC supports National Physicians to serve their local communities. National Physicians are doctors who are from these regions, know the languages and understand the cultural context.

Understanding the Need

- By 2030 World Health Organization projects a shortage of 10 million health workers in low- and middle-income countries (LMICs)
- An additional 143 million surgical procedures are needed in low- and middle-income countries (LMICs) each year to save lives and prevent disability.
- Of the 313 million procedures undertaken worldwide each year, only 6% occur in the poorest countries, where over a third of the world's population lives.

Dr. Alliance & Cynthia Niyukuri

Kibuye Hope Hospital, Burundi

Born in Burundi and raised in Kenya as a refugee, Dr. Alliance Niyukuri is a pediatric surgeon serving at Kibuye Hope Hospital, where he leads the newly established pediatric surgery unit. A graduate of Hope Africa University and trained through PAACS and COSECSA, he now serves as CHSC surgeon in Burundi. His wife, Cynthia, ministers to young women and worship leaders, and together they are raising their three children while faithfully serving in rural Burundi with CHSC.

Dr. Elvis Bugusu & Dr. Marlene Ishimwe

AIC Kijabe Hospital, Kenya

Originally from Burundi, Dr. Elvis Bugusu (Obstetrics & Gynecology) and Dr. Marlene Ishimwe (Pediatric Surgery fellow) are a husband-and-wife team serving at Kijabe Mission Hospital in Kenya. Both graduates of Hope Africa University, they completed advanced training in Tanzania and now feel called to use their skills in medical missions to serve some of the region's most vulnerable patients with compassionate, Christ-centered care with CHSC.

Dr. Oliver & Anna Schmidt

Diospi Suyana Hospital, Peru

Serving in the Peruvian Andes, Dr. Oliver Schmidt, a third-generation missionary doctor, and his wife Anna, an environmental engineer, provide medical and public health services to the Quechua people through Diospi Suyana Mission Hospital. With deep roots in ministry and missions, they are raising their four children while using their professions to serve vulnerable communities and share the love of Christ with CHSC.

Dr. Anatole & Niva Nzanzu

Central Africa

Dr. Nzanzu Kipata Anatole is a Congolese (DRC) medical doctor and surgeon who has undergone extensive education and training in Africa. He is also a devoted Christian and has ministered in various countries, including Gabon, Liberia, and Malawi, alongside his wife Niva and their three children. They have a passion for God, people, and music, and have been immersed in cross-cultural environments since their childhood. Dr. Anatole uses his medical expertise and faith to serve and make a positive impact in the communities where he works with CHSC.

Improving Care Where It's Needed Most

Scan to learn how CHSC's Iron to Silver initiative is helping hospitals around the world improve healthcare quality, strengthen research, and save lives in low-resource settings.

Quality Improvement & Research

Christian Health Service Corps' team of US based academic physicians work alongside hospitals and clinics around the world to improve the quality of care and achieve better outcomes for patients. We call this program Iron to Silver, recognizing it may not always be possible to reach the Gold Standard for healthcare quality in resource limited settings. However, we can still engage in continuous quality improvement in the healthcare we deliver.

Our QI team consults with hospitals and clinics on specific areas of need identified by local medical leadership, then works to develop a strategic quality improvement plan utilizing the best evidence-based practices.

Our QI team also works to support research inquiries by our field teams to improve quality and better outcomes in medically resource poor settings.

- We are presently supporting and leading quality improvement research initiatives in Mexico, Kenya, Angola, and Malawi.
- We are also mentoring local physicians in academic peer reviewed research.

Why Quality Improvement?

Each year, an estimated 5.7 to 8.4 million people die due to poor quality healthcare in low- and middle-income countries (LMICs).

This staggering figure represents up to 15% of all deaths in these countries.

- These deaths are not just due to lack of access to care. Too often it is because of ineffective, unsafe, or delayed care once patients reach health facilities. As many as 60% of deaths from conditions requiring healthcare in LMICs are due to poor quality, while the remaining 40% result from non-utilization or inability to access the health system.

IRON 2 Silver

Hospital Yojoa: A Vision for Hope and Healing in Honduras

Located near Lake Yojoa in central Honduras, Hospital Yojoa is a developing mission hospital designed to serve thousands of people living in the surrounding rural mountain communities — many of whom have little or no access to medical care. With no public hospital in a 100-kilometer radius, the need for a full-service facility is urgent.

Christian Health Service Corps is partnering with local leaders to help establish Hospital Yojoa as a 150 bed Christian mission teaching hospital, offering:

- Labor and delivery care
- Surgical and emergency services
- Pediatric and adult inpatient care
- Diagnostic and outpatient clinics

The hospital will serve as both a regional hub for compassionate healthcare and a training center for national and international medical professionals, equipping future healthcare workers to serve in Honduras and beyond.

No hospital within 100 kilometers. Hospital Yojoa will help change that.

Hospital Yojoa: Building Hope in the Heart of Honduras

Healthcare in Honduras

"One of the key indicators used to determine the vitality of a country's healthcare system is the number of hospital beds per 1,000 people." According to World Bank data, in Honduras, that number is just one fifth that of the United States.

With insufficient hospital beds, wait times for care are longer and ultimately, health outcomes suffer.

Why the Yojoa region?

We believe the Yojoa region is strategically located to serve as a hospital site to help alleviate the overwhelming patient flow into the public healthcare system. It will also serve as a good location for teaching and training Honduran and expatriate medical providers, which will increase long-term capacity of the healthcare system.

Learn More & Get Involved

Scan to learn more about the development of Hospital Yojoa and how it will bring lifesaving care to underserved communities in Honduras.

From Vision to Reality

These floor plans represent more than walls and rooms—they reflect our shared commitment to bringing compassionate, Christ-centered care to a region in desperate need. Every line drawn is a step closer to safe deliveries, emergency surgeries, and families receiving care they once went without.

Hospital Yojoa is being thoughtfully designed to serve thousands of people in the rural communities surrounding Lake Yojoa. With each phase of construction, we move closer to opening a facility that will not only treat illness, but also train future medical professionals and share the hope of the Gospel.

Together, we are building more than a hospital—we are building a legacy of healing.

Watch the Vision

Other Healthcare Programs

Reducing Maternal Mortality in Angola

Angola has one of the highest maternal and neonatal mortality rates in the world. In 2023 CHSC launched a strategic initiative to prevent maternal death in Angola led by CHSC physicians Dr. Daniel and Dr. Priscila Cummings. **2025 data indicates a 64% decrease in maternal deaths at Kalukembe hospital since the initiation of our maternal health program.** The program includes training local physicians in C-sections, training midwives and nurses in emergency obstetric care, training nurses in rural health outposts in screening for high-risk pregnancies. In 2024 CHSC completed construction of a maternal waiting home (MWH) at Kalukembe Hospital in Angola. The CHSC Maternal Waiting Home (MWH) at Kalukembe Hospital allows mothers with high-risk pregnancies to stay on the hospital grounds for the last few weeks of their pregnancy.

Obstetric fistula repair in Angola

Millions of women in developing countries live with the humiliation and dejection of obstetric fistula, a devastating complication of childbirth. This program focuses on bringing hope back to women scarred and isolated due to obstetric fistulas. **CHSC OB/GYN Dr. Priscilla Cummings**, has done specialized training in obstetric fistula repair. In 2025, Dr. Cummings did **40 obstetric fistula repair surgeries** for women in the Huila province of Southern Angola.

Community Health Evangelism (CHE)

In 2025 CHSC CHE initiatives served more than 25,600 people in their communities, conducted 13 Training of Trainer courses, trained 52 pastors, and 80 new community volunteers. Community Health Evangelism (CHE) has proven effective as a strategy to engage community response to their own health problems. It equips community volunteers and the church to address prioritized health, social, and spiritual issues using participatory methods.

Mexico Mobile Clinic Unit

Our Mexico Mobile Clinic was purchased in 2019. In 2025, 1,151 patients received care, maternal health screenings and health education in the remote rural villages of the Sierra Madre of Northern Mexico. The CHSC staff at Hospital Mission Tarahumara operate this clinic and facilitate health education, primary healthcare and prenatal healthcare with ultrasounds. They have also been conducting research to identify ways to improve neonatal outcomes in the region. Our team uses it as part of our effort to address the nearly 50% rate of child mortality in the Tarahumara tribe of the Copper Canyon region.

Rheumatic Heart Disease Screening for Children

Rheumatic heart disease affects millions of children globally. Untreated strep throat in childhood results in the death of 300,000 children each year, mostly in poor countries. Preventing these deaths is easy with the identification and early treatment of RHD. Hope for Hearts program helps identify RHD in children and addresses the root causes when it can be easily treated. In 2025, we screened more than 12,000 children in Ethiopia and Kenya using handheld ultrasound machines and trained local health workers.

Malnutrition Care

In 2025, CHSC supported the care of **1,735 hospitalized children with severe acute malnutrition as a primary diagnosis. However, of the 30,770 pediatric inpatients** we cared for globally in 2025, approximately **one third** had some level of malnutrition as a secondary diagnosis. Our malnutrition re-feeding programs provide lifesaving care to malnourished children, many of whom are so severely ill they are unable to eat, walk or stand. Many children we care for are days or even moments away from death when they arrive. CHSC physicians and healthcare professionals care for malnourished children in most of the locations where we serve. Even Doctors Without Borders and other nutrition programs frequently refer children for our inpatient care.

Board of Directors

Anthony "Tony" Rector, DO
Chairman
Tony is a family and emergency medicine physician with extensive experience in global missions and church leadership.

Candi Seager, RN
Treasurer
A co-founder of CHSC and longtime nurse, Candi leads with both financial wisdom and deep personal care for missionaries.

Jade Schwedock, RN, BSN
Secretary
Jade served in rural Uganda as a medical missionary and now works in elder care alongside her husband.

Lawrence "Buddy" Holt, PhD
Board Member
A seasoned executive and bi-vocational pastor, Buddy brings over 30 years of leadership and ministry experience to CHSC.

Gregory D. Seager, RN, MSN
CEO, Board Member
Greg is a global health leader, author, and speaker committed to raising standards in international healthcare missions.

Guillermo "Will" Chavez, JD
Board Member
An attorney with expertise in healthcare and family law, Will brings strong legal and financial insight to CHSC's mission.

Jody Collinge, MD
Board Member
Dr. Collinge is a pediatrician and CHE consultant who has served as a medical missionary and curriculum developer globally.

Nick Schwedock, MD
Board Member
Board-certified in family medicine and palliative care, Dr. Schwedock previously served as a missionary in Uganda.

William Caire, MD
Board Member
A family physician with obstetrics training, Dr. Caire served for a decade in Peru and Kenya and led CHSC's East Africa team.

Cherie Holt
Board Member
Cherie is a former missionary, homeschool mom, and gifted mentor with a heart for discipleship and hospitality.

Allison Caire
Board Member
Allison is a high school teacher who was taught at Rift Valley Academy in Kenya and now teaches at a Dallas Christian School.

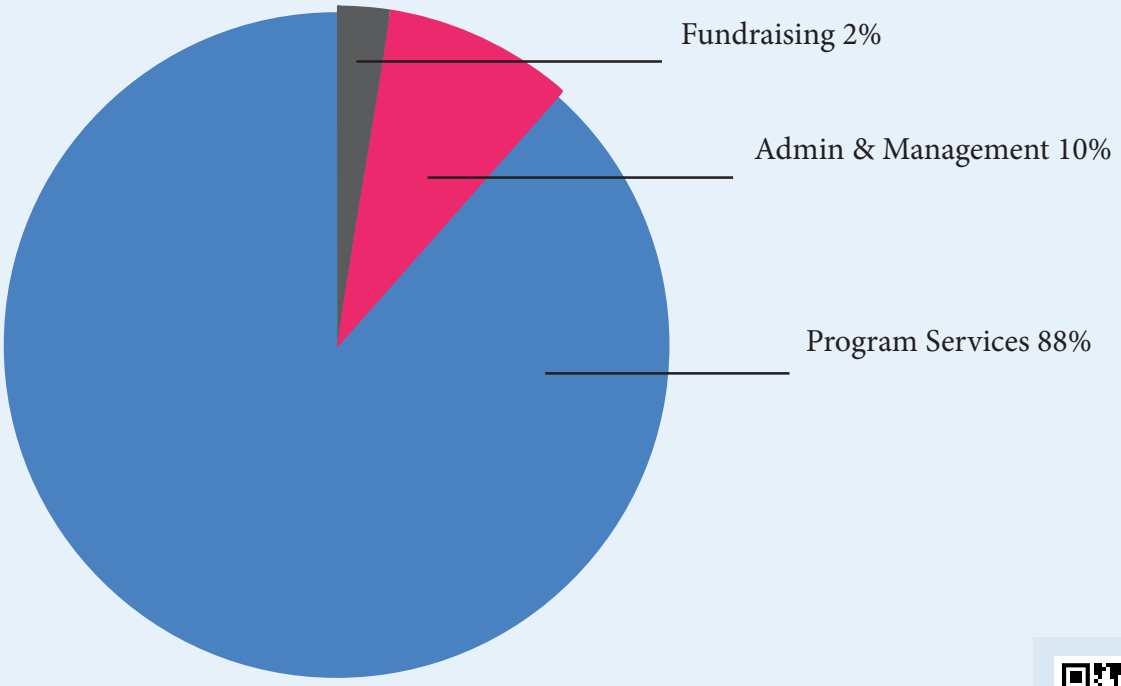

Andrew Mayo
Board Member
Andrew is a seasoned leader in global health, medical missions, and nonprofit management.

chsc
CHRISTIAN HEALTH SERVICE CORPS

Our Board of Directors brings together business leadership, global missions, and community development. Each member plays a vital role in guiding the mission and vision of Christian Health Service Corps as we expand Christ-centered healthcare to the world's most vulnerable.

Finances & Allocation

In 2025 we built up the capacity of healthcare facilities and programs and supported our partners in the care of **over 1.2 million patients**, all on **less than $6 million** - making CHSC one of the most efficient healthcare charities in the world.

A Bold Vision for Global Impact

10 million lives touched. 10 million stories changed.

At Christian Health Service Corps, we dream big—because the need is big.

Around the world, half the population still suffers without access to safe, compassionate healthcare. Every day, preventable diseases claim lives. Every day, families are devastated by a lack of care.

Our vision is clear: Provide compassionate, Christ-centered care for 10 million people every year!

This is not just a number. Each of those 10 million people is a human life. They are the mother safely delivering her child, a child recovering from severe malnutrition, or a family receiving needed surgical care they never thought possible.

Each life is a testament to the healing power of both medicine and ministry.

We know this goal won't be achieved overnight. It will take perseverance, growth, and the continued partnership of donors, volunteers, and healthcare professionals who share our mission. Step by step, community by community, hospital by hospital, we are building the capacity to transform healthcare for millions across the globe. Through God's provision, and with unwavering commitment, we move forward—believing that every life matters and that no one should be left without access to lifesaving healthcare in their time of need.

Join the Vision

Scan to learn how CHSC is working toward reaching 10 million people each year—and how you can be part of bringing healing and hope to communities around the world.

chsc
CHRISTIAN HEALTH SERVICE CORPS

With Gratitude

We are deeply grateful for every donor, volunteer, healthcare worker, and partner who stood with us in 2025. Because of your prayers, generosity, and commitment, thousands of lives were touched with hope, healing, and Christ-centered care. Every patient served, every surgery performed, and every healthcare worker trained happened because you chose to join us in this mission. Thank you for believing with us that no one should die from preventable causes—and that every life is precious in the eyes of God.

Looking Ahead to 2026

As we move into 2026, our vision remains bold and unwavering. We will continue to expand access to compassionate healthcare, strengthen hospitals, train more local healthcare providers, and grow our impact in communities where the need is greatest. With God's guidance and your continued partnership, we look forward to reaching more people, building stronger health systems, and moving closer to our vision of providing healthcare for 10 million people each year. The work ahead is great—but so is the hope we carry.

Together, we are changing lives for eternity.
